Managed to put forward a proposal to ESA. It's been selected for discussion.
I'll keep you updated.

Fantastic. I was beginning to wonder if anybody in ESA was really looking for real anomalies. Good job, Ananda.

Any questions directed at our investigation of Paracelsus should be directed to me. Ananda was able to get through to ESA but I'm hoping Mark's flyover will convince them to look further. It all depends, I guess, on what other proposals they get and how compelling they are or will be. To me, the "clearing" around the anomalies is what got me right off.

Again, thanks, Ananda.

fran
