To: "The-Lunascan-Project@googlegroups.com" <The-Lunascan-Project@googlegroups.com>

These Lunar Orbiter photos (Figure 1D-PDF File)of Malapert Mountain are incredible! Look at the circular area at the left, the tube with supports in the middle & the square at the far right. What are the opinions of the Lunascan Group members of these Lunar Orbiter Malapert Mountain Photos? <https://lunascan.com/submittals/carlotto/Malapert-Mtn/malapert.pdf> This article(PDF File) says we need LRO photos of Malapert Mountain!

**Subject:** [the-lunascan-project] Colleague requests help

Rick,

I think the confusion comes from colleagues replying to emails with the wrong subject headings because they don't know how to generate a new subject. I had an email that gmail lost because of that, where I am sure, that Mark Carlotto responded to your question about Malapert Mountain, stating he saw no anomalies. This as a result of your initial submission. Still some confusion as to who first submitted it. For some reason I created a folder for Mark. Also who was it that said we needed LRO shots of the area? Anyway, I posted the LRO images..

<https://lunascan.com/submittals/carlotto/Malapert-Mtn/>

Once we find out who made the original submittal I will correct the folder.

BTW, this is the URL you punch in to begin a new subject.

There are thousands of "interesting" images from Clementine, Apollo, even Lunar Orbiter that suggest better imaging from LRO, all before LRO went to the moon. That doesn't mean somebody is suggesting artificiality. Rick, is there anything in this area we should be looking for and did any of the LRO images I provided show anything?

Hi all,

I never responded to this email, just an earlier one regarding the Russian sightings of UFOs over the South Pole.

So as I understand it Malapert is a area discussed for setting up a lunar base. What is the interest in LRO and other older historical imagery over this area? Is it to find evidence that someone has started to build a base there or something else?

Mark

OK, I think I'm finally caught up on this thread. I looked at the paper (fig. 1d) Rick found and the links to the Malapert Mountain LRO images that Fran provided. I see nothing that looks artificial.
